How Children Learn Math

The Science of Math Learning in Research and Practice

Nancy Krasa, Karen Tzanetopoulos and Colleen Uscianowski

Written for pre-service and in-service educators of children in pre-school through grade 5, this book connects research in cognitive development and math education to offer an accessibly written and practical introduction to the science of elementary math learning.

Structured according to children’s mathematical development, How Children Learn Math systematically reviews and synthesizes the latest developmental research on mathematical cognition into accessible sections that explain both the scientific evidence available and its practical classroom application.
